Job Title: Laboratory and Production Mycologist

Schedule: Full Time

Company: Field and Forest Products

Location: Peshtigo, WI

Deadline for application: Jan 1, 2014

Description:
Field and Forest Products is looking for a detail oriented, self motivated Laboratory and Production Mycologist to join our production team. The successful candidate will have the responsibility of managing our strain library for long term maintenance and short term expansion of mushroom spawn and coordinate inventory. A key function of the candidate will also be to help design and implement laboratory and field trials and explain the supporting science behind product performance. This role will provide a high degree of visibility and opportunity to travel and network with professional educators and customers.

Additional responsibilities include:

- Characterization and implementation of techniques measuring biological indicators for quality control and ensures that results are generated, summarized and communicated to the lab manager
- Assist in production of spawn
- Learn a wide variety of basic skills concerning mushroom cultivation and mushroom spawn production as well as fundamentals of sales and shipping. Development of special skills and interests of the candidate as it relates to our mission is strongly encouraged.
- Computer skills in Word, Excel and Powerpoint
- Ability to work with limited supervision

Background:

- BS acceptable, MS preferred in Biology, Agricultural Sciences or related field.

Field and Forest Products is a highly respected, 30 year old specialty mushroom spawn company. Our mission is to produce superior quality mushroom spawn, provide exemplary customer service and education surrounding the use of our products awhile fostering a positive economic and ecologically enriching outcome.
Because we endeavor to continue exploring the possibilities of mushroom cultivation and fungal relationships in our food production systems, we prefer the candidate to have a background in Mushroom Science or Mycology. However we expect to train the successful candidate in the particulars of spawn production so encourage individuals of strong interest with broad scientific background to apply.

Salary and Benefits: Competitive salary; commensurate with experience. We are an equal opportunity employer. Benefits package includes: health insurance, paid vacation, retirement plan and an interesting, relaxed and fun work environment with a strong team approach.
